SUMMARY

As a Web Developer, I specialize in building dynamic, user-facing websites and applications, with a focus on creating visually appealing and responsive designs that optimize user experience. Skilled in HTML, CSS, JavaScript, React.js, TypeScript, and modern frameworks, I develop interactive, high-performance web pages that engage users across devices. I am committed to leveraging the latest industry trends and technologies, such as Vite for faster builds and AWS services for scalable architecture, to deliver optimal results. With strong attention to detail, problem-solving abilities, and experience collaborating with cross-functional teams, I consistently drive the development of seamless, robust, and user-centric web solutions.

SKILLS

Libraries/Frameworks: **React.js, Redux, React testing library, Jest, Material UI**
Languages: **JavaScript, Typescript, SQL, HTML/CSS**
Other familiar languages: Java
Others: Node.js, JSON, Next.js, SCSS, LESS, Bootstrap Tools: Jenkins, Elastic Kibana, SonarQube, Swagger, Fiddler, VS Code, Debugger tools, IBM cloud controller, IBM RTC, Jira, Gitlab, Github, Postman, Tailwind CSS

EXPERIENCE

Full Stack Developer

Deloitte   **April 2024 - Present, Bengaluru, Karnataka, India**

· Developed public and internal web applications for a leading German luxury automobile client using React.js, TypeScript, Vite, and JavaScript.
· Built responsive, high-performance user interfaces leveraging React.js and TypeScript for dynamic and interactive web experiences.
· Utilized Vite for fast, optimized development and build processes, enhancing overall project efficiency.
· Ensured robust functionality and code quality with React Testing Library, Jest, and SonarQube, reducing errors and improving maintainability.
· Integrated APIs using Swagger and Postman, streamlining communication between front-end and back-end services.
· Leveraged AWS Lambda and CloudFront to create scalable, serverless solutions that improved performance and reduced infrastructure costs.
· Contributed to the client's digital transformation by developing user-centric applications for both public-facing websites and internal tools.

Associate Developer

Cognizant Technology Solutions   **December 2020 - March 2024, Bengaluru, Karnataka, India**

· Developed and implemented web application using cutting edge technologies such as React, Redux, JavaScript, Typescript, HTML, CSS and JSON integration.
· Proficient in Git, Fiddler, Jenkins, VS Code, Swagger, IBM RTC and Cloud Controller with strong expertise in DOM manipulation. Extensive experience working with REST APIs and JSON for efficient data exchange. Skilled in responsive design using Bootstrap and Material UI, ensuring cross-browser compatibility and optimal user experiences.
· Expertise in the banking and financial sectors, with knowledge of international systems such as SWIFT payments and Fedwire. Strong background in the U.S. telecommunications industry.
· Proficient in using SonarQube, Elastic (Kibana), Jira, and other tools to drive project management, quality assurance, and data analysis, improving efficiency by 25%. Collaborated with cross-functional teams across China, USA, and Australia, enhancing global communication and project delivery. Expert in agile methodologies, Scrum framework, and CI/CD, consistently meeting deadlines and delivering high-quality results.

EDUCATION

Bachelor of Engineering(B.E) in Computer Science and Engineering

HKBK College Of Engineering · Bengaluru · 2020 · 6.7

Pre-University College

Sri B.G.S PU College Balehonnur · Chikkamagaluru · 2016 · 79%

CERTIFICATIONS

Cloud Practitioner

Amazon Web Services(AWS) · 2024

Oracle Cloud Infrastructure AI Certified Foundations Associate

Oracle · 2023

Hacker Rank Certification on React.js
