SUMMARY

As a Full Stack Developer, I specialize in building scalable, user-centric web applications with expertise across both frontend and backend technologies. On the frontend, I develop responsive and interactive interfaces using HTML, CSS, JavaScript, React.js, TypeScript, and modern UI frameworks to deliver seamless user experiences across devices. On the backend, I work with Java, Spring Boot, REST APIs, and database technologies such as PostgreSQL and Amazon Aurora to build secure, high-performance enterprise applications. Experienced in banking and financial domains, I have contributed to real-time transfer systems, subledger management, and account management solutions while collaborating effectively with cross-functional teams in agile environments.

SKILLS

Libraries/Frameworks: React.js, Spring Boot, Maven, Redux, Redux Toolkit, React Testing Library, Jest, Material UI, Next.js, Tailwind CSS, React Bootstrap, AG Grid.

Languages: Java, JavaScript, TypeScript, SQL, HTML/CSS, JSON, SCSS, LESS.

Databases: PostgreSQL, Amazon Aurora.

Tools & Platforms: GitHub Copilot, Swagger, Bruno, DBeaver, Splunk, Liquibase, PactFlow, Jenkins, Elastic Kibana, SonarQube, i18n, Fiddler, VS Code, Debugger Tools, IBM Cloud Controller, IBM RTC, Jira, Confluence, Jira MCP, Confluence MCP, GitLab, GitHub, Bitbucket, Git, Postman, AWS, ADFS Security.

EXPERIENCE

JPMorgan Chase & Co.

Software Engineer II

November 2025 - Present, Bengaluru

- Developed and maintained backend microservices for banking and transfer domains using Java and Spring Boot, focusing on scalable and secure transaction processing systems.
- Worked on real-time transfer systems enabling instant fund movement between bank accounts with emphasis on transaction reliability, low latency, and secure processing.
- Contributed to subledger transaction modules, including allowance and chores management workflows between parent and child accounts, handling balance updates and transaction tracking.
- Implemented internal fund transfer functionalities supporting seamless transfers between customer-owned accounts within the banking ecosystem.
- Developed external account management features allowing customers to link and manage external bank accounts for transfers and related financial operations.
- Integrated and worked with databases including PostgreSQL and Amazon Aurora using tools such as DBeaver for query optimization, debugging, and data validation.
- Utilized tools and platforms including Maven, Swagger, Splunk, Liquibase, and PactFlow for API development, monitoring, database versioning, and contract testing.
- Worked with version control and collaboration platforms including Git, Bitbucket, Jira, and Confluence for agile delivery and documentation management.
- Leveraged AI-assisted development tools such as GitHub Copilot along with Jira MCP and Confluence MCP integrations to improve development productivity, requirement analysis, and documentation workflows.
- Participated in organizational Innovation Week hackathon initiatives, collaborating on innovative solution development and rapid prototyping within banking technology use cases.

Deloitte Touche Tohmatsu Limited

Senior Software Engineer

April 2024 - October 2025, Bengaluru

- Developed innovative customer-facing and internal web applications for a prestigious German luxury automobile client, utilizing React.js, TypeScript, Vite, and JavaScript to deliver exceptional digital experiences across multiple high-impact projects.
- Crafted Responsive Interfaces: Engineered highly interactive and visually stunning user interfaces with React.js and TypeScript, driving engagement and ensuring seamless user experiences.
- Enhanced Development Efficiency: Leveraged Vite to streamline development and build processes, significantly boosting overall project efficiency and reducing time-to-market.
- Ensured Code Quality: Employed React Testing Library, Jest, and SonarQube to guarantee robust functionality and maintainable code, leading to a reduction in errors and an improvement in code quality.
- Implemented Global Reach: Utilized the i18n framework for localizing web applications into multiple languages, catering to a diverse global audience.
- Optimized API Integration: Facilitated smooth communication between front-end and back-end services by integrating APIs using Swagger and Postman.
- Developed Scalable Solutions: Designed scalable, serverless solutions using AWS Lambda and CloudFront, enhancing performance and reducing infrastructure costs.

Cognizant Technology Solutions

Associate Developer

December 2020 - March 2024, Bengaluru

- Innovative Web Solutions: Engineered sophisticated web applications leveraging React, Redux, JavaScript, TypeScript, HTML, CSS, and JSON to deliver seamless and dynamic user experiences.
- Proficient Tool Utilization: Expertly utilized Git, Fiddler, Jenkins, VS Code, Swagger, IBM RTC, and Cloud Controller to enhance project workflows, with a strong expertise in DOM manipulation.
- Efficient Data Handling: Gained extensive experience working with REST APIs and JSON for efficient and reliable data exchange.
- Responsive Design Excellence: Crafted responsive designs using Bootstrap and Material UI, ensuring cross-browser compatibility and optimal user experiences.
- Secure Financial Solutions: Designed and developed a secure web application for a banking and financial institution, facilitating financial transactions between organizations and integrating payment methods such as SWIFT, MPF, Fedwire, and IBT.
- Dynamic Telecommunications Solutions: Collaborated with teams to build a dynamic web application for a telecommunication domain client, enabling retail store employees to manage customer requests, including new connections, plan upgrades, and device purchases.
- Project Management Expertise: Proficiently used tools like SonarQube, Elastic (Kibana), Jira, and others to drive project management, quality assurance, and data analysis, improving efficiency by 25%. An expert in agile methodologies, Scrum framework, and CI/CD delivering high-quality results.
- Global Collaboration: Enhanced global communication and project delivery by collaborating with cross-functional teams across China, USA, and Australia.

EDUCATION

Bachelor of Engineering(B.E) in Computer Science and Engineering

HKBK College Of Engineering • Bengaluru • 2020

Pre-University College

Sri B.G.S PU College Balehonnur • Chikkamagaluru • 2016

CERTIFICATIONS

Oracle Cloud Infrastructure AI Certified Foundations Associate

Oracle • 2024

Hacker Rank Certification on React.js

HackerRank • 2024

AWS Cloud Practitioner

Amazon Web Services(AWS) • 2024
